

VIP L GASPOOL-NCG

The VIP L GASPOOL-NCG will be established by 1. November 2018. Due to the fact that this VIP only involves Open Grid Europe on the NCG-side of the border the implementation of this VIP is relatively easy and the establishment can therefore be managed by 1.11.2018. Also on the Gaspool-side, due to the lower complexity (transfer of new “existing contracts” to the VIP by Nowega and GUD) the establishment of the VIP L GASPOOL-NCG by 1.11.2018 is realistic.
